

Become an MU Ambassador

At MU, we are strengthening our network through strategic collaboration – and inviting professionals to join as MU Ambassadors

MU is a leading, international Executive Search and Leadership Consultancy. We specialise in the accurate assessment and selection of leaders.

By helping clients secure the right leaders and improve the effectiveness of existing leaders, we help them outperform.

As an MU Ambassador, you are linked to leaders and are close to discussions on how to find, select, and develop people and organisations towards success. You are close to the MU value proposition and can leverage your network to connect with potential MU clients. When an introduction leads to a successful assignment, you receive a corresponding fee.

If you are well-connected, commercially minded, and interested in creating value through introductions, we'd like to hear from you.

What does being an MU Ambassador entail?

This role is open to professionals across industries – from business partners to candidates and industry leaders – who are motivated to represent MU within their networks. Ambassadors operate as external partners and are not involved in day-to-day operations.

As an Ambassador, you leverage your network to generate business leads to MU. These will typically be introductions of MU to potential clients, that MU will pursue and develop into assignments.

For every successful introduction that leads to an assignment for MU, you will receive a fee corresponding to a portion of the revenue generated. It's a straightforward model built on shared success.

I am interested in becoming an MU Ambassador. How to go ahead?

Reach out to Isabella Valentini, Partner and Team Director Associate Network, or to MU Experts in your network, for any further questions and for a discussion on how to collaborate under this agreement and represent MU with new clients.

We look forward to working together and broaden MU's reach.
